

NMAMIT CSE KNOWLEDGE BASE

Academic Assistant Information – Excluding Faculty Profiles

Institution: NMAM Institute of Technology (NMAMIT), Nitte

University: Nitte Deemed to be University (NDU)

Department: Computer Science and Engineering (CSE)

Primary syllabus target: NDU B.Tech CSE 2025–2029

Document prepared from official Nitte/NMAMIT sources checked in October 2026.

Important RAG Data Rules

- Treat batch, scheme and academic year as metadata for every academic rule.
- Do not apply an old regulation automatically to a newer batch.
- For exact marks, credits, attendance thresholds, promotion rules or fee amounts, prefer the latest official document/page applicable to the student's batch/year.
- If the official source does not provide a verified value, the assistant should say that the value must be checked from the current official notification instead of inventing it.
- Faculty profiles are intentionally excluded from this document.

1. CSE Department Overview

The Department of Computer Science & Engineering at NMAMIT was established in 1986. It offers undergraduate, postgraduate and research programs and has practiced outcome-based education since 2014. The department describes its laboratories and supporting facilities as state-of-the-art and provides audit courses and special courses on advanced topics to help bridge curriculum and industry requirements.

Vision

To be a center of excellence in Computer Science & Engineering education and research, empower the lives of individuals to fulfill their academic excellence, professional passions, and partnership for community development.

Mission

- Impart knowledge through state-of-the-art concepts and technologies in Computer Science and Engineering.
- Inculcate professional ethics, leadership qualities and lifelong learning.
- Prepare professionals for employment in industry, research, higher education, community partnerships and entrepreneurship to benefit society.

Program Educational Objectives (PEOs)

- Graduates will be capable of practicing principles of Computer Science & Engineering, Mathematics and scientific investigation to solve problems appropriate to the discipline.
- Graduates will be able to contribute to their profession and society.
- Graduates will be employed in the computing profession or engaged in learning to pursue higher education.

Program Outcomes (POs)

PO1 – Engineering knowledge: Apply mathematics, science, engineering fundamentals and engineering specialization knowledge to complex engineering problems.

PO2 – Problem analysis: Identify, formulate, review research literature and analyze complex engineering problems using first principles.

PO3 – Design/development of solutions: Design solutions and system components/processes meeting specified needs with consideration of public health, safety, cultural, societal and environmental factors.

PO4 – Conduct investigations: Use research-based knowledge and methods, including experimentation, analysis and interpretation of data, to reach valid conclusions.

PO5 – Modern tool usage: Create, select and apply appropriate techniques, resources and modern engineering/IT tools while understanding their limitations.

PO6 – Engineer and society: Apply contextual knowledge to assess societal, health, safety, legal and cultural issues and professional responsibilities.

PO7 – Environment and sustainability: Understand the impact of engineering solutions in societal and environmental contexts and the need for sustainable development.

PO8 – Ethics: Apply ethical principles and commit to professional ethics and responsibilities.

PO9 – Individual and team work: Function effectively as an individual and as a member or leader in diverse and multidisciplinary teams.

PO10 – Communication: Communicate effectively through reports, documentation, presentations and clear instructions.

PO11 – Project management and finance: Apply engineering and management principles to manage work and projects in multidisciplinary environments.

PO12 – Life-long learning: Recognize the need and ability for independent and lifelong learning in the context of technological change.

Program Specific Outcomes (PSOs)

- Foundations of Mathematical Concepts – Apply engineering science and mathematics knowledge to solve problems appropriate to the discipline.
- Foundations of Computing – Apply computing knowledge involving hardware and software to real-world engineering problems.
- Foundations of Software Design & Development – Design and develop algorithms, programs and projects using software and modern tools appropriate to industry or R&D.

CSE Program Structure

- B.Tech CSE duration: 4 years.
- Number of semesters: 8.
- Current CSE NDU syllabus versions are listed for multiple batches; the official department page currently includes an NDU 2025–2029 syllabus.
- The department page currently lists an intake of 360 students for B.Tech CSE.

- Research centre: the department states that it is an established research centre of VTU since 2007 and that from 2022–23 the Ph.D. degree is awarded by Nitte University.
- Active research areas listed by the department include Algorithms, Cryptography and Network Security, Data Mining, High Performance Computing, Image Processing, Machine Learning & Big Data Analytics, Wireless Networks and Web Services.

CSE Laboratories and Facilities

- Advanced Programming Laboratory
- Application Development Laboratory
- Data Structures / Algorithms Laboratory
- Microprocessors & Microcontroller Laboratory
- Network / RDBMS Laboratory
- Systems Programming Laboratory
- Web / Unix Programming Laboratory
- Logic Design Laboratory
- Research / PG Laboratory
- Computer Programming Laboratory

The department page also lists 400+ computer systems and other hardware, 14 operating systems, 56 application software packages and 10 computer servers.

2. CSE Syllabus – NDU 2025–2029

The official CSE department page provides an NDU syllabus specifically for the 2025–2029 batch. The linked syllabus document is the authoritative source for course codes, course titles, credits, L-T-P structure, assessment components, course outcomes, unit-wise topics, electives, laboratories, projects and other syllabus details.

- Course code and course title
- Semester
- Credits
- Lecture/Tutorial/Practical structure
- Course category
- Continuous/internal assessment and SEE components where specified
- Course objectives and course outcomes
- Unit-wise syllabus/topics
- Laboratory courses
- Electives
- Project work
- Internship components
- Textbooks and reference books

RAG instruction: do not reconstruct missing course credits or marks from memory. Retrieve them from the official 2025–2029 syllabus document.

3. Academic Information and Academic Calendar

NMAMIT publishes NDU academic calendars by semester. The current official calendar page lists 2026–27 calendars for I & II, III/V/VII, IV/VI and VIII B.Tech semesters, along with SEE timetables.

- Academic calendar contains important semester and examination dates.
- Course registration and other academic activities follow the schedule notified by the University/institution.
- Students should follow the regulation applicable to their own batch and scheme.
- Attendance and internal assessment requirements affect examination eligibility.
- Academic progression, course completion, backlog/repeat courses, withdrawal and graduation requirements are governed by the applicable regulation document.

Batch-Specific Rule

Do not hard-code a generic 75% attendance rule, fixed credit requirement, passing mark or promotion rule into the RAG. The applicable NDU regulation must be identified by batch/scheme before answering such questions.

4. Examination Information

Nitte publishes examination procedures and guidelines for university examinations. These include examination-centre procedures, attendance/internal-assessment eligibility, examination applications, hall tickets, seating arrangements and answer-book handling.

- Students with shortage of attendance and/or internal assessment marks are not eligible to appear in University examinations according to the published examination guidelines.
- Online examination application forms are hosted before theory examinations; the published procedure specifies 30 days for yearly-scheme programmes and 15 days for semester-scheme programmes.
- Eligible candidates must carry the admission/hall ticket and identity card for theory examinations.
- Only candidates with hall tickets and examination staff are permitted to enter the examination hall.
- Strict silence is required in the examination hall.
- Candidates are not permitted to use clipboards or similar items while writing examinations.
- UG answer books are issued according to the published procedure and additional sheets/booklets are not provided under that procedure.
- Theory papers are subject to double evaluation by internal and external examiners; a third valuation is used when the difference exceeds the threshold specified in the published guidelines.
- Students may apply for retotalling within 10 days of declaration of results, subject to the stipulated fee.
- Students may apply for answer-script viewing within 10 days of declaration of results, subject to the stipulated fee.

5. Internship and Research Internship

The CSE department lists industry collaborations that support internship and project activities. Examples currently listed on the department page include Infineon Technologies India Pvt. Ltd., Wipfli India LLP and other industry partners.

Industry-linked opportunities

- Infineon: internship and project-work assistance, joint conferences/seminars, placement assistance for eligible students and guest lectures.
- Wipfli India LLP: academic collaboration, exchange of academic/scholarly information, seminars/workshops, curriculum and laboratory strengthening, and internship/placement support subject to available openings.
- The department page also lists other industry collaborations with activities such as practical training, internship/project work, curriculum interaction, seminars and placement support.

Summer Research Internship Program (SRIP)

NMAMIT's Summer Research Internship Program invites faculty members to propose project ideas. Students select projects and enroll. After the semester-end examination, selected students work on the chosen topic for about two months. The stated expected deliverables are completion of the project and preparation of a research paper.

Official SRIP contact:

- Dr. Sudesh Bekal, Dean (R&D)
- Email: dean_research@nitte.edu.in
- Cell: 8904010966

Examples of CSE SRIP research areas/projects

- Morphed Image Detection
- Analysis of the effect of music on mental health using AI
- Text Context Switch Detection
- Video Anomaly Detection
- Audio Dub Detection
- Sentiment Analysis of Local Language Using NLP
- Malicious Site Detection with Virtual Machine Firewall
- AI Malware Analysis
- Sentiment Analysis with Machine Learning
- Cyber Security
- Economy (inflation/deflation) prediction
- Analysis of Cyber Crime in Social Media/Digital World
- Automatic Drying System Using IoT

These are examples published by NMAMIT for earlier SRIP cycles and should not be treated as the current year's project list.

6. Admission, Fee and Scholarship Information

B.Tech CSE Admission

- B.Tech CSE is a 4-year undergraduate program at the Nitte campus.

- The official admissions page states that candidates must pass Class 12/equivalent with at least 50% aggregate in the specified optional subjects, with English as one of the languages of study, and be 17 years old by 31 December of the admission year.
- For the General category, Indian nationals who studied Class 12 in India are admitted based on merit in NUCAT according to the current admissions page.
- NRI-category admissions are separately described on the official admissions page.

Fee Structure – 2026–27

The official NMAMIT admissions page confirms that the current B.Tech fee structure is published separately under the institution's Program Fee information. For the RAG, the academic year must always be stored with any fee value.

Item	Amount	RAG Status
CSE tuition fee	₹3,50,000/year	Reported for 2026–27; verify against latest official Program Fee before answering
Examination fee	₹10,000/year	Reported in current fee information; verify latest official notification
Total tuition over 4 years	₹14,00,000	Arithmetic based on ₹3.5 lakh/year; excludes examination/other charges
Total tuition + exam over 4 years	₹14,40,000	Arithmetic if ₹10,000 exam fee applies each year; verify current fee notice

Important: fee figures can change by admission year, category, scholarship status and other conditions. The RAG should not answer a fee question for a future academic year using a 2026–27 figure.

NUCAT Scholarship

- The official NMAMIT admissions page states that 20% of seats in each program/branch are set aside for candidates topping NUCAT.
- The same page states that scholarship amounts of 20%–40% of the prescribed fee are offered to NUCAT toppers.
- Scholarship eligibility and continuation conditions should be checked against the current year's official scholarship/fee notification.
- Nitte also publishes separate scholarship information and government/other scholarship links on its scholarship page.

7. Frequently Asked Questions (FAQ)

Q: Which syllabus should a CSE student admitted in 2025 follow?

A: The official NMAMIT CSE page provides an NDU CSE syllabus for the 2025–2029 batch.

Q: Where can I find the official CSE syllabus?

A: Use the NMAMIT CSE department page and its NDU 2025–2029 syllabus link.

Q: How long is B.Tech CSE?

A: The program is listed as 4 years with 8 semesters.

Q: What is CIE/internal assessment?

A: It refers to assessment conducted during the semester as prescribed by the applicable course and regulations.

Q: What is SEE?

A: SEE refers to the Semester End Examination.

Q: Can a student write the University examination with attendance shortage?

A: The published Nitte examination guidelines state that students with shortage of attendance and/or internal assessment marks are not eligible for University examinations. The exact attendance requirement should be checked against the student's batch regulation.

Q: Does CSE provide internship opportunities?

A: The department lists industry collaborations supporting internship and project-related activities.

Q: Does NMAMIT have a research internship program?

A: Yes. NMAMIT runs a Summer Research Internship Program in which students select faculty-proposed research projects.

Q: How long does the Summer Research Internship Program run?

A: The official SRIP description says students work on selected projects for about two months after the semester-end examination.

Q: Where can I find the academic calendar?

A: Use the official NMAMIT Academic Calendar page.

Q: Where can I find examination procedures?

A: Use the official Nitte Examination Procedures and Guidelines page.

Q: Where can I find scholarship information?

A: Use the official Nitte scholarship page and NMAMIT undergraduate admissions page.

Q: Can the AI assistant give exact attendance/marks/credit rules?

A: Yes, when the applicable batch and official regulation are identified. Otherwise it should explicitly say that the exact rule needs verification.

Q: Can the AI assistant give current fee information?

A: Yes, but it must identify the academic year and use the latest official fee information.
